\$10.00/Month Billed Annually

BlackBerry

Currently Supported Devices

- All BlackBerry Devices manufactured by Research In Motion, Inc. (RIM).

Service Overview

When you're away from the office, you can feel out of touch with your business. Well, not anymore. With DataSol, Inc.'s BlackBerry Enterprise Server Service, virtually your entire email account is available in real time on your handheld BlackBerry device.

Handheld synchronization with your desktop email, calendar, contacts, tasks and notes is now available at your fingertips no matter where you are*, instantly!

That means you can compose, send, receive, and reply to emails in airports, restaurants, churches, hospitals, while riding in a taxi, bus, truck, or limo and have all of your messages delivered instantly!

Messages that you reply to on your Blackberry device will show as "replied-to" in Outlook - as if you were on your PC using Outlook! Updating your calendars, contacts, tasks, notes and email remotely has never been faster or more reliable.

BlackBerry Enterprise Service is fully integrated with your existing DataSol Exchange email-hosting service.

Stay in touch and be productive - anywhere!

NOTE: You must have first established DataSol 2003 service before you can order BlackBerry Wireless Email Service. Additional 4.1 features such as wireless contact synchronization requires a BlackBerry device with BlackBerry handheld firmware version 4.0 or later. DataSol, Inc. does not provide support for nor software for device firmware updates.

Features

- Wireless access to email (send/receive), calendar, contacts, tasks and notes virtually anywhere!
- Includes Mobile Data Service - surf the web and use Internet-enabled third party applications with your Blackberry Device.
- Receive email attachments (formats supported: Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Corel WordPerfect, Adobe PDF, ASCII files)
- Integrates transparently with your existing DataSol email account
- Message filtering
- Triple DES encryption to thwart unauthorized access
